

21ST CENTURY SKILLS

CONTINUITY IN LEARNING

SCAN TO VIEW VIDEO!

Respect

Values and Respect comes first. All kids and parents will be fully orientated before we teach academics.

Health and Wellness

Green outdoor space enable kids to exercise and getting the Vitamin D is so vital to fight any viruses. Nutrition education is part of our curriculum.

Independent Kids

Now kids can learn on their own; meaning can do revision at home and in the school with proper learning tools.

ABOUT FOUNDER

I started a Multiple Intelligence Brain Based kindergarten in 2005 after I taught kindergarten kids ICT for four years. 21 st century education was a perfect fit for me.

Now with our technology and platform kids can easily read at least 3 languages within the first 2000 days without the pain! The Pandemic propelled me to produce digitized contents so that all kids can benefit.

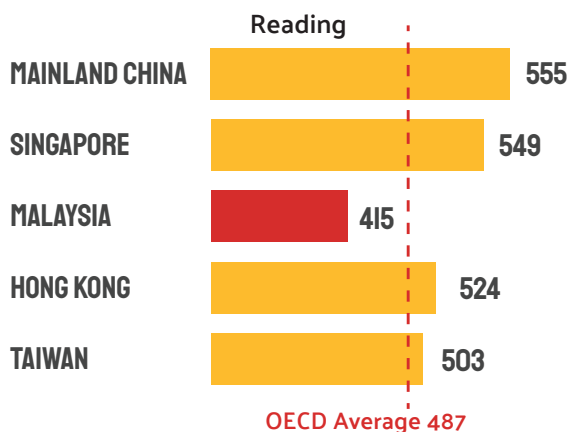

By 2019, all my effort were recognized as I was awarded by EduTech Asia for the best use of Emerging Technology. This year, I was over the moon to be the recipient of the Global Edutech Leadership award.

I am happy to share my experiences and inspire everyone to embrace the new paradigm in education. Ultimately, I hope to bridge the divide between the rich and the poor. By embracing Neuroscience and through the use of AI and Big data, poorer kids can benefit from the lower cost yet high quality education.

ABOUT TADIKA AKTIF

21ST CENTURY FUTURE PRE SCHOOL

THE ASHES OF OUR EDUCATION

Reference: The Star, 29 Dec 2019

Today, we are an award winning school from EduTech Asia. Let's all be open minded and embrace the new paradigm in education like China and Singapore. Otherwise, our Malaysian kids will be left behind as shown in the chart above.

WELL PREPARED FOR PRIMARY SCHOOL?

Learn multiple languages with tools that boost student performance with teacher that care.
